

NEW FEATURES ON PENSIONSWEB

We are pleased to announce the release of the following new pensionsWEB functionality:

Welcome page

This is an exciting refresh to the look and feel of the welcome page and is mainly in response from feedback you've given us. You will immediately see a key piece of information displayed on log in (e.g. fund value for a DC member or deferred pension for a deferred member). You will be alerted to view or update important information such as your expression of wish form and you address.

Look and feel of the site

Key features:

- Mobile-friendly – the site can now be viewed on smartphones and tablets
- Navigation – has been made more user-friendly
 - menu bar moved from the side of the page to the top
 - more stream-lined, uncluttered appearance
- pensionsWEB has consistent branding throughout the public and member secure parts of the site

Up to date deferred pensions can be viewed

You will soon be able to see your deferred pension revalued to date, as well as the pension on leaving service. If your scheme offers a cash lump sum in addition or a lump sum death benefit, these amounts will also be revalued.

Change bank details online

Existing DB pensioners and beneficiaries may update their bank details through a secure link. Changes will be immediately confirmed by email

Expression of wish

Members will be able to update their expression of wish form on line. You will be able to see your latest election as an electronically signed document

Beneficiary access

Beneficiaries may now access pensionsWEB. They will be able to see their pension payslips and P60s on line.
